

Certification Portal

www.VIRTUALVENUES.com

You know the certification process: counting seminar attendees, tracking participation, and sending out individual licenses. You may find yourself spending more time bogged down in these details than on the educational content itself.

ENTER V2.

V2's custom built portal overhauls the certification process for a hassle-free user experience.

We provide:

- » NASBA CPE, RCH, and AICPA compliant
- » Support with serious troubleshooting acumen
- » A customized, brand-aligned portal

“ V2 created a streamlined solution that saves us time for every webinar we host. Before V2, we manually created certificates of attendance and emailed them to each attendee. That cost hours of employee time and space on our email server each time. After partnering with V2, the entire process is now automated and even allows attendees to access past certificates. Thank you, V2! ”

- Ivan Hsieh, EMLab P&K,
